Summary

I'm a 400 level student in Babcock University, Computer Science major and Information Systems minor. An intuitive software engineer focused on mobile applications development seeking for more knowledge about Tech, Mobile Applications Development, Artificial Intelligence and FullStack Development. (C++, Dart and Flutter lover).

Passionate Mobile Application Developer | Specializing in Dart/Flutter & Firebase

Crafting intuitive and visually stunning mobile apps for iOS and Android platforms.

Leveraging the power of Dart/Flutter to create cross-platform solutions that drive user engagement.

Utilizing Firebase for real-time database management, user authentication, and cloud integration.

Collaborating with global clients to bring their app ideas to life.

Freelancing on Upwork to maintain a flexible and dynamic work environment.

Let's connect and explore opportunities to build exceptional mobile experiences together!
