

YAOVI EMMANUEL JOSUE DJOSSOU

joemdjossou@outlook.com / +22893142733 / Available Worldwide for Remote Contracts

Summary

Senior Software Engineer · 6+ yrs building production-scale data & backend systems · Data pipelines (ETL/ELT) · Data versioning & QA · Java/Spring Boot · Node.js · Python · MongoDB/SQL · Firebase · AWS · Docker/Kubernetes · Redis/Caching · Bilingual speaker with hands-on experience structuring West African and Worldwide language content.

Experience

Senior Full Stack Engineer & Data Engineer

Upwork (Freelance) · Remote

09/2020 - Present

- **Data pipelines:** Built ETL/ELT pipelines to ingest, clean, and transform data from multiple sources (REST APIs, Google Forms/Apps Script, CSV/webhook feeds) into structured MongoDB/SQL stores for downstream reporting and analytics.
- **Schema/versioning:** implemented schema versioning and migration strategies to support reliable dataset evolution.
- **Data quality/QA:** Implemented data validation and integrity checks (input sanitization, deduplication, automated tests) to maintain high data quality across production datasets.
- **Analytics/BI:** Instrumented product analytics pipelines (PostHog) feeding dashboards for KPI tracking and business reporting.
- Architected and built scalable backend services using Java (Spring Boot, Hibernate) and Node.js, designing RESTful and microservice-based APIs that powered high-traffic production applications.
- Developed high-performance cross-platform mobile applications using Flutter and Dart, delivering responsive UI and seamless user experiences across iOS and Android.
- Designed and optimized database schemas (SQL and NoSQL, including MongoDB) to support reliable data access, performance at scale, and clean data modeling practices.
- Applied TDD and rigorous code review practices across the stack, writing unit and integration tests that improved code quality, reduced regressions, and streamlined CI/CD workflows.
- Partnered directly with product managers and designers to translate business requirements into technical solutions, owning features end-to-end from architecture through deployment.

Lead Mobile Engineer

EdoMatch · Lomé, Togo (Hybrid)

02/2025 - 08/2026

- Working in a different country than my homeland but making significant impact working with the big tech and non tech companies as well as the government.
- Improved user retention by 107% and gained 104% more users on the mobile apploication with a total of 70 000+ users and 100 000+ downloads.
- Design and develop high-performance, user-centric mobile applications using Flutter & Dart.
- Optimize apps for speed, scalability, and accessibility while implementing modern UI/UX designs.
- Collaborate with backend teams to integrate APIs, AWS services, and ensure seamless functionality.
- Analytics: Instrumented product analytics pipelines (PostHog) feeding dashboards for KPI tracking and business reporting.
- Research and integrate AI-powered features to enhance user experience and innovation.
- Maintain high code quality through thorough reviews, security best practices, and performance optimizations.
- Troubleshoot complex issues and adopt emerging technologies to improve mobile solutions.
- Work closely with product managers, designers, and stakeholders to define project requirements.
- Mentor junior developers, fostering team growth and technical excellence.

AI/ML Technical Trainer

TDEV • Lomé, Togo.

11/2025 - 07/2026

- Designed and delivered hands-on **AI training** curriculum for developers and students, teaching practical techniques for building *AI-powered solutions tailored to West African markets and use cases*.
- Guided participants through applied *AI/ML concepts from prompt engineering and API integration to deploying AI features in real-world apps* bridging the gap between theory and production-ready implementation.
- Mentored emerging developers on translating *AI capabilities into locally relevant solutions*, fostering a new generation of builders equipped to solve region-specific challenges.
- Combined technical instruction with real project work, helping students move from *AI concepts to shipped prototypes and portfolio-ready builds*.

Senior Mobile Engineer

01Supplies • Cotonou, Benin (Remote)

10/2024 - 02/2025

- Led the development, testing, and deployment of the company 3 high-performance mobile applications, ensuring seamless functionality across iOS and Android platforms.
- Spearheaded the successful release of multiple applications on the Google Play Store and Apple App Store, contributing to a 53% increase in user engagement and higher retention rates.
- Created a Continuous Integration/Continuous Deployment (CI/CD) pipeline that reduced time-to-deployment from 3 days to 4 hours
- Implemented automated testing that increased code coverage to 78%, reducing the number of production issues by 43%

Software Engineer

Babcock University Computer Club • Ilishan-Remo, Nigeria

11/2023 - 05/2024

Worked and reviewed some repositories from the BUCC GitHub page and projects:

- Reviewed the BUCC companion mobile application that makes information on topics available to students at any time.
- Worked on the BUCC ME App that basically help student get personalized hub for all things related to their university like events and data
- Reviewed the BUCC Ballot App that was used by the electoral committee for the departmental election

Mobile Application Engineer

Google Developer Student Clubs Babcock • Ilishan-Remo, Nigeria

09/2023 - 05/2024

- Participated in some workshops and talks about mobile applications development with Flutter and Dart
- Trained students and beginners to develop mobile applications development with the Flutter framework
- Worked with a team of experienced students flutter developers in developing and launching a mobile application called Study Stats that helps students from comprehensive GPA tracking to in-depth performance analysis and goal setting, available on Play Store and App Store

Software Engineer

CENTECH-TOGO • Lomé, Togo

01/2023 - 07/2023

- Developed high-performance cross-platform mobile applications using Flutter and Dart, enhancing user engagement and satisfaction.
 - Collaborated with product managers, designers, and backend engineers to create seamless user experiences and optimize app performance.
 - Integrated backend APIs to implement complex functionalities, ensuring stability and efficiency of applications.
 - Conducted regular testing and debugging, consistently improving application performance and user experience.
-

Projects

1. Hymnes et Louanges Adventiste App

It is an app I built available worldwide with more than **20,000+ downloads** and over **15,000 users** within **9 months** designed to enrich your personal worship, prayer groups, or religious services. Structured and tagged multilingual text and audio content (French, Ewe, Spanish, Portuguese, English) for a 20K+ download application, including search indexing by lyrics/metadata:

- Search your hymns by number, title, author, or lyrics
- Save your hymns locally or in the cloud
- Filter hymns by theme or sub-theme
- Choose between light and dark mode
- Select the app language (French, Ewe, Spanish, Portuguese or English)
- Listen to the full song or each voice separately: soprano, alto, tenor, bass
- View the musical score
- Discover the story behind some hymns

2. Web-based Mental Health Application for Students (Associated with Babcock University, Ilishan-Remo, Nigeria)

This project was born out of a passion for leveraging technology to address real-world challenges, particularly in the realm of mental health. With mental health issues on the rise, especially among university students, it became evident that a proactive solution was needed.

3. Study Stats (Google Developer Group on Campus)

A group project led by Chibuikem Michael Okpechi that maximizes the students potential and simplify GPA tracking with the premier GPA analysis tool. From comprehensive GPA tracking to in-depth performance analysis and goal setting, Study Stats does the job.

Education

BSc Computer Science (Information Systems)

Babcock University • Ilishan-Remo, Ogun State

07/2024

Graduated with **3.39/4 CGPA** on an ABET-accredited program; I was involved in:

- Babcock University International Students' Association (BUISA)
- [Babcock University Students' Association \(BUSA\)](#)
- [Babcock University Computer Club \(BUCC\)](#)
- [Google Developer Student Clubs – Babcock \(GDSC Babcock\)](#)
- Nigeria Association of Adventist Students (NAAS)
- COSC Worship Center ICT and Sound Team

Certificates

International Driver License, English Proficiency Certificate, Jobberman Soft Skills Training Certification, Discover the Universe of Cybersecurity, Speak in Public, Understanding the Web, Improve Efficiency When Working Remotely

Awards

Award of Recognition Babcock University Students Association, Award of Excellence AYM, Award of Leadership COSC Babcock University, Award of Service COSC Babcock University, AY Gold Award for Physical and Cultural Excellence

Skills

Bilingual, Mobile Applications, Software Development, Documentation review, English, Leadership, Time management, Communication skills, Ability to Work Under Pressure, Features Driven Development, Debugging, Fast Learning, Web Development, iOS Development, Firebase, Android, Artificial Intelligence, Vibe coding, First Aid Basics, Java, JavaScript, SpringBoot, Firebase, MongoDB, Docker/Kubernetes, Redis/caching, Python, Flutter, Apple Store, Google Play Store, GitHub, ETL/ELT & data pipeline tools, Data versioning, PII/data compliance, BI tools, NLP/text data exposure, Ewe, Dart, Java, JavaScript, Nuxt, VueJS, Machine Learning, Deep Learning, Natural Language Processing

Languages

English, French, Ewe
